FORECAST OF THE WINTER TIL CROP OF EASTERN BENGAL IN 1911-12.

[NOTE.—On the average of the five years ending 1909-10, the area under *til* crop in Eastern Bengal represents some 4·7 per cent. of the total area under *til* in British India.]

UNDER Government orders two forecasts are published annually for the *til* crops in Eastern Bengal districts. The first summer *til* forecast was issued in August last, and the present forecast covers the winter or *rabi til* crops of 1911-12.

Owing to rain and an untimely rise of the rivers in October and November sowings were restricted and late. Subsequently the few showers required to promote growth and produce a good outturn were not forthcoming.

District Officers' estimates indicate a total sowing of 65,900 acres against 66,100 last year and an outturn of 91 per cent. this year as against 85 per cent. of the normal per unit area.

From records of experimental harvestings the normal yield per acre is taken as 4 cwt. On this basis the outturn this year is estimated at 12,000 tons as compared with 11,200 tons in 1910-10.

Director of Agriculture, Bengal.

Bogra ...	1,600	1,200	1,000	47	45	Last part of October Late.	1st part of January A little late.	The rainfall in October prevented the sowing of the crop in due time, and want of rain subsequently retarded its growth.	
Pabna ...	12,300	6,000	6,000	90	90	Middle of September Normal.	Middle of November Normal.	The area cultivated would have increased if the river had not again risen after subsiding about the usual time. The outturn is below normal owing to want of moisture in the soil during January and February.	
Malda ...	6,500	2,000	1,600	100	89	Beginning of November. Late	End of February. Late	The decrease in area compared with last year was due to the sowing being late owing to excessive rain and flood at sowing time. Subsequent weather was not very favourable, and the growth of the crop was not good.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 22nd April 1912.

Summary.—Rainfall in Presidency and Burdwan Divisions has been moderate; in Eastern Bengal it has been heavy and accompanied by many hailstorms. The prospects of jute and *aus* rice are threatened owing to the impossibility of weeding the waterlogged fields. Hail has damaged crops in several districts, but the extent of injury is not very serious because most *rabi* crops have already been harvested and others are not sufficiently advanced to suffer much.

Prices of common rice have risen, the average being 1·3 per cent. higher than last week.

Cases of rinderpest are reported from the west, central and also the south-eastern districts.

The examination will be conducted either at the College, or by an Accountant-General (including Government Examiner of Railway Accounts and Examiner of Accounts, Lower Ganges Bridge Project), in Bengal, Eastern Bengal and Assam and Burma only. The examination will be *ipso facto* vitiated if it be not held (begun and completed) on the dates fixed; but the officer who will conduct the examination may make his own arrangements with the candidates in regard to the *place* and *hour* of examination.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination, even if he is more than 25 years of age, and may be appointed to an accountantship, if he passes it; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

*This term includes employment under Local Boards and foreign bodies, if such is pensionable by the British Government.

2. The candidate should apply to an Accountant-General not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of Rs. 10 and the following certificates and registration form duly filled in, and must be forwarded by him, not direct to the Principal, but through the Accountant-General.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age, baptismal or of birth (not required, if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's hand-writing.

(4) Registration statement containing the following information :—

(*g*) Examinations passed.

(*h*) Thumb mark of candidate, left hand, to be made in the presence of a responsible person who knows candidate.

(*i*) Signature and address of above-mentioned witness.

NOTE.—A candidate already in Government service should, in like manner, submit his application through his immediate official superior to an Accountant-General (including Government Examiner of Railway Accounts and Examiner of Accounts, Lower Ganges Bridge Project), qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Accountant-General concerned or at the College

It will rest with the Accountant-General (including Government Examiner of Railway Accounts and Examiner of Accounts, Lower Ganges Bridge Project) to whom the candidate submits his application, to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination, or whether his application should be rejected. The Accountant-General or the other officers referred to will then forward to the Principal, for registration, the names of the accepted candidates, together with their registration statements, which should be signed by the Accountant-General. The registration statements should be carefully preserved by the Principal. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the College, or at the office of the Accountant-General. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of applications of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. If from any cause a candidate fails to appear for the examination, the fee paid will not be refunded.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that, in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. Passed candidates should apply, not to the Principal of the College, nor to the Comptroller-General, but direct to the Accountant-General or Government Examiner of Railway Accounts in the province or railway under whom they may desire to be employed.

8. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

9. Candidates for the 4th grade Accountantship examination, who are not Government servants and over 25 years of age, are allowed to appear at the examination of the Sibpur College centre only, but, even if successful, they are debarred from employment in the service of Government, and their names will be excluded from the list of passed candidates which is furnished to the Comptroller and Auditor-General.

10. Candidates over 25 years of age should apply in writing to the Principal of the Civil Engineering College not later than 30 days previous to the examination; the application to be accompanied by the fee of rupees ten, and the Registration statement prescribed in rule 2 (4).

DEPARTMENT OF AGRICULTURE, BENGAL.

FORECAST OF THE *Rabi* CROPS OF 1911-12 IN EASTERN BENGAL.

[NOTE.—On the average of the five years ending 1909-10, the area under *boro* rice in Eastern Bengal represents some 0·4 per cent. of the total area under rice in British India.]

THE most important constituent of the *rabi* crops of Eastern Bengal are the pulses, such as *khesari*, *mung*, *maskalai*, *arhar*, *masur*, gram and peas. The total area covered by these crops is estimated at about 8½ lakhs of acres, but to a large extent they are grown on land from which a rice crop has been taken earlier in the agricultural year. Next in importance come the tobacco and *boro* rice crops, each covering about 2¾ lakhs of acres. The tobacco crop is a very valuable asset, especially in Rangpur and

Jalpaiguri *Boro* rice also contributes largely to the prosperity of the country, because though the grain is coarse the crop is a heavy yielder and practically never fails. Orchard and garden crops, which are harvested during the cold and dry seasons, from 15th November to 15th June, are included as *rabi* crops. They comprise chiefly vegetables, *pan* leaf, cocoanuts, betel-nuts, etc. A general idea of their extent can be formed from the rough estimate of their area, viz., $2\frac{3}{4}$ lakhs of acres. Condiments and spices (ginger, turmeric, coriander, chillies, etc.) other than those grown in gardens are represented by an estimate of $1\frac{1}{3}$ lakhs of acres. The cereals include barley and such millets as *cheena* and *kaon* covering a total area of about a lakh of acres. The only fibre grown as a *rabi* crop is sunn hemp, the cultivation of which is most general in the Serajganj subdivision of Pabna, but is also more widely extended in other districts than is indicated by the present estimates. Other *rabi* crops, viz., oilseeds, sugarcane, and wheat, are repor ed on separately.

2. *Character of the season.*—Owing to copious monsoon rainfall the season was expected to be very favourable; but late heavy showers in October and November accompanied by an untimely rise in river levels, damaged early sowings and delayed further sowings. Subsequently the usual cold-weather showers, which greatly promote the growth of *rabi* crops, failed; December in particular was a month of extreme drought, and the ensuing three months did not produce much alleviation. Since the latter part of March there has been a great deal of rain, but in most cases it came too late to be beneficial, in some cases even it was so heavy as to injure the standing crops On the whole the season was not favourable.

Outturns.—District Officers estimate the average outturn of *rabi* pulses at 75 per cent. of the normal yield per unit area; some of them have not distinguished between pulses and millets; the estimated total area under these two varieties of crops is 881,200 acres against 933,300 acres last year. The estimated area under tobacco has also declined from 285,100 acres to 268,300 acres, and the outturn per unit area from 85 to 73 per cent. of the normal; this crop suffered severely from the weather conditions mentioned above. The cereals were the only *rabi* crops not adversely affected by the weather conditions. Much of the *boro* rice is irrigated; District Officers estimate the outturn per acre at 89 per cent. of the normal; it would have been more but for the storms which have damaged the crop during April; the estimated area under *boro* rice has also increased slightly and stands at 275,200 acres. District Officers return the area under barley as having decreased to 64,300 acres and estimate the outturn per acre as only 75 per cent. of the normal. There can be little doubt that the latter figure at any rate is too low and that the crop gave at least a normal yield per unit area. Orchard and garden produce is returned as yielding 83 per cent. of the normal outturn per acre, the untimely distribution of rain being responsible for the yield falling below average. Similar remarks apply to "condiments and spices" which are estimated as yielding 82 per cent. of the normal outturn per unit area, and to sunn hemp, estimated at 79 per cent. It is probable that most of the district estimates of outturn are too low; but except in the case of barley, sufficiently definite information is not available to justify modification of the figures.

CALCUTTA, S. G. HART,

The 26th April 1912. *Director of Agriculture, Bengal.*

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 29th April 1912.

Summary.—Storms have been frequent and rainfall generally heavy. In the western districts conditions are favourable for cultivation, but in the eastern half of the province excessive rain has damaged crops already sown and is preventing further sowings and the weeding of jute and *aus* rice.

Prices of common rice continue to rise, partly owing to heavy exports. The average retail price this week is 1·4 per cent. higher than last week.

Rinderpest is prevalent in the Presidency and Chittagong Divisions.

Draft Rules.

1. So long as the Commissioners deem it practicable and consistent with the maintenance of an efficient water-supply, they may allow any owner or occupier of a masonry building, paying a water-rate imposed under the provisions of Part VII of the Bengal Municipal Act, 1884, on the annual value of such building, when such annual value is not less than Rs. 150, to lay down communication-pipes from the service-pipes of the Commissioners for the purpose of leading water to such building for domestic purposes only subject to the following rules and conditions.

2. The owner or occupier of any masonry building requiring water to be laid on to such building for domestic purposes, or requiring any addition or alteration to an existing water-supply, must apply for the same on a printed form to be supplied free of cost at the Municipal office.

3. A fee of Rs. 2 must be paid to the Commissioners by such owner or occupier for each building connection before any work is commenced, such

fee to be in addition to all other costs and charges imposed under these rules.

4. Each building must have a separate connection, and extensions from the communication-pipe of one building to another shall not be permitted.

5. The owner or occupier of the building, in respect of which the connection is required, must pay the entire cost of the connection, including the supply and fixing of the fittings referred to in rule 7, and must also pay the cost of such alterations in, or repairs to, roads, drains, sewers, and gas or water mains or pipes, and the cost of such other works, as may be necessitated by, or result from, the work of making such connection.

6. (1) The work required may, at the option of the Commissioners, either be carried out by the Commissioners themselves, at the expense of the owner or occupier of the building in respect of which the work is required, or may be carried out by a person or firm employed by such owner or occupier and approved by the Commissioners.

(2) The work must be done under the supervision of an officer appointed by the Commissioners in this behalf, and no connection must be made with the Municipal water main except at such time as may be appointed, and in such position as may be selected, by an authorised Municipal officer.

(3) If any owner or occupier shall desire to adopt any fitting of a pattern different from the standard patterns, he must present such fitting for the approval of the Chairman; and any fittings so presented may, if considered satisfactory by the Chairman, be stamped, and samples thereof may be purchased and placed among the standard fittings.

9. The size of the ferrule referred to in clause (*a*) of rule 7 shall be decided by the Commissioners, but its diameter shall not differ from that of the communication-pipe referred to in clause (*b*) of that rule by more than ¼ inch.

10. (1) The diameter of the communication-pipe shall be determined with regard to the average pressure in the main supply-pipe at the point nearest the building for which a connection is required and to the quantity of water to be supplied.

(2) The diameter of the communication-pipe shall be such that it will be capable of delivering the estimated daily supply in six hours.

(3) The building connection, when fitted in position, must be capable of standing a pressure of 100 feet, and no water shall be supplied until this test has been applied by the Commissioners.

14. The Commissioners shall depute an authorised person to read every meter not less than once a quarter, and shall give notice to the occupier at least twenty-four hours before the reading is recorded.

15. (1) Every owner or occupier of any building in respect of which a connection has been made under these rules shall be entitled to a supply of 750 gallons of water per quarter for each rupee paid by him as water-rate per annum in respect of such building.

REPORT ON THE BRUCE INSTITUTION FOR THE YEAR 1911.

NOTIFICATION.

No. 3074.—The 6th April 1912.—The following is published for general information.

J. H. KERR,
Secy. to the Govt. of Bengal.

Report on the Bruce Institution for the year 1911.

I. *Control.*—(1) During the year under review the following gentlemen were appointed by Government, under rule 10, to be Governors :—

(*a*) Mr. M. Prothero, *vice* Mr. E. L. Preston, resigned.
(*b*) The Hon. Mr. F. H. Stewart, *vice* Mr. A. M. Monteath, resigned.

(2) The following is a list of the Governors holding office at the end of the year :—

The Hon. the Chief Justice of Bengal, The Most Revd. the Lord Bishop of Calcutta, The Inspector-General of Civil Hospitals, Bengal, The Chairman of the Calcutta Municipality, The Director of Public Instruction (Honorary Secretary),	*Ex-officio.*
The Hon. Sir Richard Harington, Bart.	
The Hon. Mr. W. C. Madge, C.I.E.	
The Hon. Mr. F. H. Stewart, C.I.E.	
The Ven. Archdeacon Wickins.	
The Revd. Father A. Van de Mergel, S.J.	
The Revd. R. C. Grose.	
M. Prothero, Esq., M.A.	

II. *Capital and Income.*—The capital of the Institution stood as in the previous year, at Rs. 10,51,200, of which Rs. 10,46,200 are in the form of a 3½ per cent. stock certificate of the year 1865. The balance, viz., Rs. 5,000, is invested in 3½ per cent. Government Securities. The annual interest on the capital amounts to Rs. 36,792. The year opened with a balance of Rs. 19,775-6-10 and closed with a balance of Rs. 3,035-15-6. The reason why the closing balance was unusually small is that the second half-yearly interest of Rs. 18,396 for the year, which is generally received in December, was not received till January 1912.

III. *Election to vacancies, etc.*—(1) The annual election of foundationers was held on the 31st January. For the 20 vacancies advertised, 66 applications were received, but 3 vacancies having subsequently occurred, 23 girls were elected on the recommendation of a sub-committee consisting of the Hon. Mr. W. C. Madge, C.I.E., Mr. M. Prothero, the Revd. Father A. Van de Mergel, S.J., and the Revd. R. C. Grose. Of the girls elected, 12 were placed in the Loreto Convent, Entally (9 in the Boarding School and 3 in the Orphanage), 5 in the Calcutta Girls' High School, 2 in the Loreto Convent, Asansol, 1 in St. Joseph's Convent, Cuttack, 1 in the Protestant European Orphanage, Cuttack, 1 in the Pratt Memorial School and 1 in the Dow Hill School, Kurseong.

(2) Of the 14 girls withdrawn during the year, 6 had attained the age of seventeen years, the limit ordinarily allowed under the rules ; 5 girls were withdrawn before they had attained that age, and 3 died.

(3) Of the girls who had been withdrawn during the preceding year, and in respect of whom reports have been received during the year under review, one was employed as a pupil-teacher in the school where she was educated ; another is being trained as a teacher in the Training School at Kurseong. One girl is employed as a typist in a Government office ; another is learning shorthand and type-writing and one is learning type-writing only. One girl was married.

(4) At the close of the year there were 137 girls on the foundation against 126 in the preceding year. They were distributed as follows :—

Loreto Convent, Entally ...	Boarding School ... 34 Orphanage ... 28		62
Calcutta Girls' High School			43
Pratt Memorial School			11
St. Paul's Mission Home			7
La Martinière, Calcutta			2
Calcutta Free School			2
Loreto Convent, Asansol			3
Old Church Parochial Home			2
Protestant European Orphanage, Cuttack ...			2
St. Joseph's Convent, Cuttack			1
St. Andrew's Colonial Homes, Kalimpong ...			1
Dow Hill School, Kurseong			1
	Total ...		137

(5) The following table affords particulars as to the class and religion of the foundationers at the close of the year :—

Class.	Roman Catholics.	Church of England.	Non-Conformists.	Total.
1. Orphans or deserted by parents.	25	10	9	44
2. Fatherless, or deserted by their fathers, or those whose fathers were incapable.	42	20	20	82
3. Having father or both parents alive.	2	1	8	11
Total ...	69	31	37	137

(6) The health of the girls was on the whole satisfactory.

IV. *Education and maintenance.*—(1) The nature of the education imparted to the girls on the foundation was generally that prescribed for Elementary and Higher Elementary Schools under the Code of Regulations for European Schools in Bengal or for the Cambridge Local Examinations. In exceptional cases a higher education is given.

(2) Parents and guardians are generally given the choice of any boarding school for the education and maintenance of their children or wards, provided that such a school has been approved by Government as suitable for girls enjoying the benefits of the Bruce Foundation. A sum of Rs. 21-8 or Rs. 16 a month is paid for the education and maintenance of each foundationer in a boarding school or an orphanage, as the case may be. A sum of Rs. 40 or of Rs. 25 is also allowed for each foundationer for an outfit on joining a boarding school or an orphanage, as the case may be. Under the rules a girl is not ordinarily allowed to remain on the Fund after she has attained the age of 17 years, when an outfit grant of Rs. 50 is generally given to enable her to make a start in life. If, however, a girl elects to take up teaching as a profession, an extension is generally allowed. Short extensions of a few months are also generally allowed to girls who are preparing for examinations under the Code of Regulations for European Schools, or for the Cambridge Locals, or who are learning shorthand or type-writing. One such extension was granted during the year.

(3) The monthly average cost of the education and maintenance of each girl on the Fund amounted to Rs. 18-11, against Rs. 18-12-8 in the preceding year.

(4) The amounts paid under the different heads of expenditure were as shown below :—

1911.	Rs.	A.	P.	1910.	Rs.	A.	P.

V. *Inspection.*—The Revd. R. C. Grose was the Visiting Governor for the first-half, and re-appointed to the same office for the second half, of the year. His reports were satisfactory. Mr. Grose stated in his first report that he found the wards of the Bruce Institution well cared for in every respect and that no sickness or disability of any kind was found among them. In his second report he stated that in all the schools he found that the wards of the Bruce Institution receive the same care and attention given to regular boarders and that the children looked well and happy and were decently and cleanly clothed.

VI. *Meetings.*—Four meetings were held during the year, and among the various resolutions passed the following may be noted :—

(*a*) That the Loreto Convent, Asansol, should be placed in the list of schools approved by Government as suitable for the education and maintenance of girls on the Bruce Foundation.

(*b*) That in future the election meeting should be held not later than the 15th January.

REPORTS ON THE WORKING OF THE POISONS ACT, I OF 1904.

THE following Resolution is published for general information :—

MUNICIPAL DEPARTMENT—MEDICAL.

Darjeeling, the 7th May 1912.

RESOLUTION No. 178T.—Medl.

READ—

The reports on the working of the Poisons Act, I of 1904, during the year 1911.

THE reports dealt with in this Resolution relate only to such districts as comprise the new Presidency of Bengal. The steps taken in previous years to make generally known the provisions of the Act were continued, and no special steps were taken in the matter during the year 1911.

2. The total numbers of licenses granted during the year under review were 208 under section 2 and 297 under section 4 of the Act. Outside Calcutta, where the total number of licenses issued under both the sections amounted to 116 against 131 licenses in 1910, the largest number of licenses were current in the Burdwan and Presidency Divisions. Out of the 15 districts in the three Divisions of Rajshahi, Dacca and Chittagong, no licenses were issued in five districts (viz. Jalpaiguri, Rangpur, Faridpur Backergunge and Tippera), and in the remainder the number of licenses current was generally small. Large numbers of licenses were granted in the districts of Midnapore (76), Birbhum (48), Dacca (44), Pabna (33), Howrah (26), Khulna (25), Hooghly (23), and (Burdwan (23). It is reported that in Calcutta, as well as in certain districts, some shop-keepers who took out licenses in previous years surrendered their licenses in 1911. This is most noticeable in the case of the district of Mymensingh, where 40 licensees surrendered their licenses, as they did not find the business profitable. The result of the surrender was that there was only one license current throughout the district during the year under report. There is reason to suspect that unlicensed sales of poisons are still going on in some places, and the District Officers should continue their endeavours to stop the illicit practice.

3. The duty of supervision and inspection was generally carried out by the police, and in some districts (especially in the eastern divisions) by medical officers. Some instances of irregularities in the mode of keeping accounts for sales of poisons were detected, and in such cases the licensees were warned. The result of inspection shows that the provisions of the Act are now generally understood.

4. The total number of prosecutions instituted under the Act was 15, of which 12 ended in conviction. These prosecutions were made in eight districts only as named in the margin. The failure of the case instituted at Calcutta necessitated the inclusion of "strychnine" amongst the poisons specified in the rules framed under the Poisons Act.

(1) Burdwan.
(2) Midnapore.
(3) Hooghly.
(4) Howrah.
(5) 24-Parganas.
(6) Khulna.
(7) Jalpaiguri.
(8) Malda.

5. During the year under review the Act appears to have worked well on the whole, and the reduction in the number of cattle-poisoning cases may fairly be attributed to its provisions. In some districts, however, the practice of cattle-poisoning is still frequent. Such crime can be checked effectively only by increased and sustained vigilance on the part of the District Magistrates in working the provisions of the law.

ORDER.—Ordered that a copy of the Resolution be forwarded to all Commissioners of Divisions, to the Commissioner of Police, Calcutta, and to the Inspector-General of Police (through the Political Department).

H. L. STEPHENSON,
Secretary to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

THIRD AND FINAL FORECAST OF THE WHEAT CROP OF BENGAL, 1911-12

[NOTE.—On the average of the five years ending 1909-10, the area under wheat in Bengal is estimated to represent 0·5 per cent. of the total area under wheat in India.]

Character of the Season.—The chief wheat-growing districts in Bengal are Malda, Murshidabad, Nadia and Pabna. Owing to heavy rain in September and October, the sowings were a little later than usual in some places; but a considerable amount of moisture was left in the soil, and the germination and growth of the crop were good. The season, however, in the chief wheat-growing districts, subsequent to the issue of the second forecast, has been marked by insufficient rainfall, and the strong west wind

has damaged the crop in some places. The prospects therefore are not uniformly favourable throughout the Province

Area sown.—The total area sown with the crop this year as estimated by the district officers is 140,000 acres against 142,800 acres last year.

Outturn.—The average of district officers' estimates of outturn per acre works out to 85 per cent. against 76 per cent. of the normal last year. The information available does not justify the adoption of any other estimates. Taking the normal yield to be 7 cwt. per acre, the estimate of total yield is 41,700 tons against 38,000 tons last year or an increase of about 10 per cent.

At the end of April the average price of wheat at the principal marts of the Province was Rs. 4-1-4 per maund or 1 per cent. higher than at the same date of last year, but 9 per cent. less than in 1910. The average wholesale price of rice on the other hand for the Province at the end of April was 16 per cent. and 13 per cent. higher than at the same dates in 1911 and 1910, respectively.

Director of Agriculture, Bengal.

For the week ending on the 20th May 1912.

Summary.—The seasonable character of the weather during the past week has improved the prospects of agriculture generally and has enabled cultivators to get on with the work of weeding their fields. The price of rice still shows a slight tendency to rise. Cattle-disease is reported from Nadia, Jessore, Malda, Dacca, Mymensingh and Noakhali.
